Session ManagerRDP clientEC2 Serial Console

You can connect to your Windows instance using a remote desktop client of your choice, and by downloading and running the RDP shortcut file below:

Download remote desktop file

When prompted, connect to your instance using the following details:

Public DNS	User name
ec2-3-90-63-84.compute-1.amazonaws.com	Administrator
Password	
zTBL2zaOpJlNSAb@axHz)DW5ERCT4UL	

If you've joined your instance to a directory, you can use your directory credentials to connect to your instance.
